

SOCIETY OBJECTIVES

The objectives of the society are to foster the development and use of statistical and other quantitative methods in the environmental sciences, environmental engineering and environmental monitoring and protection.

To this end, the Society promotes the participation of statisticians, mathematicians, scientists and engineers in the solution of environmental problems and emphasizes the need for collaboration and for clear communication between individuals from different disciplines and between researchers and practitioners.

The Society further promotes these objectives by conducting meetings and producing publications, and by encouraging a broad membership of statisticians, mathematicians, engineers, scientists and others interested in furthering the role of statistical and mathematical techniques in service to the environment.

The International
ENVIRONMETRICS
Society - TIES

TIES

An Association of the

International Statistical Institute

Finding solutions to
problems in the global
environment

THE SOCIETY

Formed in 1989 at the Conference on Environmetrics in Cairo, Egypt, The International Environmetrics Society (TIES) actively promotes the application of statistical, mathematical and computational methods to solve environmental problems. TIES has been an association (formerly known as section) of the International Statistical Institute (ISI) since 2008.

TIES serves the environmental community through the organization of international conferences, co-sponsorship of regional and international conferences with other professional organizations, publication of the journal Environmetrics in cooperation with John Wiley & Sons, communication with members through a newsletter, and by maintaining a TIES website.

The Society is administered by a Board of Directors, consisting of a President, a President-Elect, a Secretary, a Treasurer, a Publications Officer and two Regional Directors for each region with at least 20 members (current regions are North America, Europe, and Other regions).

ENVIRONMETRICS JOURNAL

Environmetrics is the official journal of TIES. It is a multi-disciplinary journal that publishes refereed papers on the development and application of quantitative methods in the environmental sciences. The scope of the journal covers a broad range of statistical, mathematical and engineering topics dealing with the analysis of environmental changes and their impacts on humans and various life forms and ecological relationships. Personal subscriptions to Environmetrics are only available through membership in the Society.

TIES NEWSLETTER

All TIES members receive our newsletter. The newsletter is a valuable vehicle to share our views, news and concerns, and to find out about job opportunities and educational developments. The newsletter reports on relevant meetings, discusses current environmetric issues, and reviews recent books.

WEB PAGE

The TIES website, located at the URL environmetrics.org provides a ready source of information on the Society and links to web pages of other environmental groups. Application forms to become a member are available there, as well as the latest information on TIES meetings, the current officers, and example copies of the TIES newsletter.

ENVIRONMETRICS CONFERENCES

TIES has held annual conferences since 1990. Topical focuses for past conferences include:

- * Modeling acid rain
- * Spatial-temporal models
- * Uncertainty analysis
- * Environmental decision analysis
- * Monitoring design and analysis
- * Quantitative methods for environmental sustainability

Meetings have been organized all over the world:

Anchorage, USA	2013	Genova, Italy	2002
Hyderabad, India	2012	Portland (Oregon)	
Margarita Island, Venezuela		USA	2001
	2010	Sheffield, UK	2000
Bologna, Italy	2009	Athens, Greece	1999
Kelowna, Canada	2008	Gold Coast, Australia	1998
Mikulov, Czech Republic	2007	Innsbruck, Austria	1997
		São Paulo, Brazil	1996
Kalmar, Sweden	2006	Bangi, Malaysia	1995
Beijing, China	2005	Burlington, Canada	1994
Portland (Maine) USA	2004	Espoo, Finland	1992
Johannesburg, South Africa		Madison, USA	1991
	2003	Treviso, Italy	1990
		Cairo, Egypt	1989

For information on current conferences please visit the TIES website: environmetrics.org
